Ensuring Safety and Avoiding Catastrophe in Telephone Nursing

MARY ELIZABETH GREENBERG PHD, RN-BC, C-TNP

NORTHERN ARIZONA UNIVERSITY, TUCSON, AZ USA
Objectives

Telephone Nursing:

◦ Discuss the role of nurse
◦ Identify the standards of practice
◦ Describe the risks associated with the practice
◦ Identify strategies to reduce the risks
The role of the nurse and the telephone

- Triage and Advice
- Coordinate Care
- Patient Education or Preparation
- Discharge or Procedure Follow-up
Symptom-based Calls

Telephone Triage:

A component of telephone nursing practice that focuses on assessment, prioritization, and referral to the appropriate level of care.

...involves identifying the nature and urgency of client health care needs and determining appropriate disposition. Greenberg et al, 2003
Standards

Professional
- Basic Nursing
- Ethical

Legal/regulatory

Organizational
Risks associated with nursing over the telephone

- Assessment/Communication
- Decision-making
- Output
- Organizational

</table>
Decision Making

Ensure Safety
- Identify nature and urgency
- Use critical thinking and nursing judgment

Risk Management Strategies
- Use DSTs appropriately
- Avoid over-reliance on DST
- Listen and think
- Look outside the box
Nursing interventions designed to meet caller needs (Greenberg, 2009)

Ensure Safety
- Disposition appropriate for assessment
- Err on side of caution
- Use critical thinking and nursing judgment

Risk Management Strategies
- Collaborate with caller
- Ensure caller understanding
- Ensure comfort with plan
- Document
Organizational Policies

Ensure Safety

- Competent nurses
- Adequate resources
- Appropriate tools

Risk Management Strategies

- Nurse education/orientation
- Document tool
- Safety centered policies
- QA/QI program
Red Flags

- Repeat callers
- Frequent fliers
- Concerned parents/caregivers
- Sudden onset/Sudden change
- “Severe” anything
- Extremes of age
- Comorbidities
